

® **starlift** mobile car lift

Mobile electro-hydraulic lifting platform for passenger cars and light lorries of up to 3.2 tons

Application

For general maintenance work, tyre changing, body repair, as well as various jobs on the underbody of the car

Advantages

- Efficient space usage due to mobility
- Little space required - no support pillars, no external control unit
- Damage-free load suspension due to rubber plate
- Infinitely adjustable operating level
- Opening of vehicle doors possible at any elevation level
- Low-maintenance due to wear-resistant lift mechanism and robust electro-hydraulics

Safety

Triple safety-lock in every elevation position - mechanical, hydraulic and electric

Operation

Electro-hydraulic via a foot pedal with infinitely adjustable operation level
Unlimited accessibility around the car

Design

Splash-proof, suitable for automatic car washes and outdoor assembly
Standard colour blue, other colour designs upon request
Optional overshoot-ramps accessible by car from either side

Dimensions and technical data

A	1950 mm	Load-carrying	
B	210 mm	capacity:	3200 kg
C	2540 mm	Motor:	3 x 400 V / 50 Hz
D	680 mm	Protection class:	IP 55
E	1490 mm	Weight:	880 kg
F	2110 mm		
G	1920 mm	TÜV-examined	TÜV ÖSTERREICH
H	60°		
I	4580 mm
